SUMMARY

Laravel developer with 8+ years shipping systems that connect businesses to the tools they depend on — CRMs, e-commerce platforms, payment gateways, and AI services. Recent work spans an automated AI content pipeline (Vertex AI + Laravel + Pinterest API), multi-gateway subscription platforms, and end-to-end CRM/WooCommerce/Facebook Lead Ads integrations. Comfortable owning a build from Figma to production, remote-first, Agile.

SELECTED PROJECTS

Storyverse — Laravel, React, PostgreSQL/MySQL, Tailwind · storyverse.amowogbaje.com

- Serialized-fiction platform with a full author studio: episode-based access tiers, AI-assisted search, badge/reward system, and multi-gateway subscriptions (Stripe, Paystack, Flutterwave) with per-country pricing.

CraftProfessor Story Engine — Laravel, Vertex AI, Pinterest API · craftprofessor.amowogbaje.com

- Automated publishing pipeline orchestrating generative AI to produce and sync narrative content across Pinterest and LinkedIn.

Qset — Laravel, React, MySQL, Tailwind · qset.amowogbaje.com

- Exam-generation platform for teachers: searchable question bank, exam-set builder, and Word (docx) export.

Nigeria Tax Calculator — Laravel, React, MySQL, Tailwind · tax.amowogbaje.com

- Live personal income tax estimator (NGN) with pension, health, and life-insurance deduction handling.

EXPERIENCE

Full Stack Developer — KOC, Nigeria (Laravel, Tailwind, Alpine.js)

Sep 2025 – Present

- Rescued a stalled project, turning a Figma design into a working, board-ready product from scratch under a tight deadline, then iterated to final delivery.
- Integrated transactional email, WooCommerce syncing, and role-based permissions into the application.
- Built a Notion-style, block-based blogging interface with Editor.js, improving content flexibility and the admin publishing workflow.

Full Stack Developer — Africred, Nigeria (Laravel, MySQL, Bootstrap, Git, API Integrations) *Feb 2025 – Sep 2025*

- Partnered with the head of team to onboard the service team onto the company CRM.
- Maintained multiple interconnected repositories, writing the integration code that let separate applications communicate.
- Implemented Facebook Instant Forms into the CRM: wrote the webhooks, tracked Facebook access-token expiry, and automated token refresh via a scheduled command.
- Led a research study to select the CRM's WhatsApp messaging provider.

Full Stack Developer — Grace Filled Academy, Nigeria (Laravel, Livewire, jQuery)

Apr 2023 – Jun 2024

- Architected the full database structure from scratch for a scalable, efficient school-management system.
- Built a report-card system end-to-end with Laravel Livewire, JavaScript, HTML, Bootstrap, and CSS.
- Used Laravel factories and seeders for full integration test coverage, ensuring reliability.
- Shipped a self-serve score-upload tool for teachers, automating calculations and cutting manual workload.
- Delivered a responsive Livewire portal for parents to view their children's academic reports remotely.

Full Stack Developer — Thinkshifts, United Kingdom (Laravel, Livewire, Vue.js, Git)

Nov 2021 – Jun 2024

- Worked as a Vue.js developer on the Carelly app for a 3-month engagement.
- Built a real-estate web application on a Laravel + Vue.js full stack.
- Managed client websites with 100% customer satisfaction.

Team Lead — Spokesman Communication Ministries, Nigeria (WordPress, Laravel, Filament, Next.js, Git) *Jun 2020 – Aug 2021*

- Worked directly with the President to run IT operations for the ministry.
- Built the ministry website: Filament admin panel, Laravel APIs, and a Next.js frontend consuming those APIs.
- Developed the annual conference website for the International Leadership Conference.

- Led the IT team for livestreaming and photography across a year of church media, recruiting and training the team.
- Migrated the ministry's asthma-and-chest-care site from WordPress to a custom Laravel CMS.

Software Developer — Spokesman Communication Ministries, Nigeria (WordPress, Laravel) *May 2017 – Jun 2019*

- Built a membership portal with Laravel, HTML, CSS, Bootstrap, and JavaScript.
- Used MaatWebsite/Laravel-Excel to import and export the church database — first hands-on use of the package.
- Supported team activity oversight as the team grew.

Software Developer — iQube Labs, Nigeria (CakePHP, Laravel) *Jan 2015 – Nov 2018*

- Advanced TradeWorkflow, a cargo-shipping app, from 40% to 80% complete using CakePHP.
- Built and managed RedBank, a Laravel app connecting blood donors with people in need, for 6 months.
- Managed Medifix, a WordPress healthcare-client site, for 3 months.

NYSC — Eclat British Academy, Nigeria *Jun 2019 – Jun 2020*

- Completed Nigeria's mandatory National Youth Service Corps, teaching children.
- Led the Red House team to the school's first-ever interhouse sports championship.
