## SUMMARY

---

Full stack developer with 8+ years of professional experience across Laravel/PHP, Node.js/NestJS, and — currently — Go, plus React, Next.js, and Vue.js on the frontend. Track record spans production integration work (webhooks, OAuth reconciliation, multi-gateway payments), applied AI integration (Gemini, Hugging Face, TogetherAI, Vertex AI), and end-to-end ownership of features from Figma to deployment. Comfortable in fully remote, cross-timezone teams.

## KEY SKILLS

---

**Frontend:** React, Next.js, TypeScript, JavaScript, Vue.js, Tailwind CSS

**Databases:** MySQL, PostgreSQL, MongoDB, Redis

**APIs & Integrations:** REST, GraphQL, webhooks, OAuth, RabbitMQ, Stripe, Paystack, Flutterwave, WooCommerce

**Applied AI:** Gemini API, Hugging Face, TogetherAI, Vertex AI, Cloudflare Agents

**Testing & DevOps:** PHPUnit, Pest, Docker, Git, GitHub, GitLab, CI/CD, DigitalOcean, Nginx, Linux

## PROFESSIONAL EXPERIENCE

---

**Backend Developer (Laravel → Go)** — Dayout, United States Jun 2024 – Present

- Currently rewriting core service endpoints — activities, notifications, emails, and comments — from Laravel to Go as part of the company's backend migration.
- Built a Push Notification Service from scratch, including three related endpoints, as part of a 3-person backend team.
- Led a research study comparing Laravel Eloquent against raw SQL that resulted in company-wide adoption of Eloquent; built all resulting database migrations and refactored the codebase around Dependency Injection and Eloquent Models.
- Contributed to the OpenAPI documentation used by the engineering team.

**Full Stack Developer** — KOC, Nigeria Sep 2025 – May 2026

- Rescued a stalled project, turning a Figma design into a working, production-ready product under a tight deadline.
- Integrated transactional email and WooCommerce syncing, and built role-based permissions using Laravel Policies and Gates.
- Built a Notion-style, block-based blogging interface with Editor.js.

**Backend Developer** — Africred, Nigeria Feb 2025 – Sep 2025

- Built webhook ingestion for Facebook Instant Forms into a production CRM, syncing prospective-client data for sales follow-up.
- Automated OAuth access-token tracking and refresh via a scheduled Laravel command.

**Backend Developer (NestJS, GraphQL)** — Televerse, Nigeria Apr 2023 – Jun 2024

- Developed optimized search APIs for the ReachMe app using NestJS, GraphQL, MongoDB, Redis, and RabbitMQ.
- Designed and implemented a simulated payment API with GraphQL, including secure coin-gifting endpoints.
- Collaborated closely with Flutter developers to integrate backend features into a mobile app.

**Full Stack Developer** — Grace Filled Academy, Nigeria Apr 2023 – Jun 2024

- Architected the full MySQL database structure from scratch for a school-management system.
- Used Laravel factories and seeders for full integration test coverage under real data volumes.

**Full Stack Developer** — Thinkshifts, United Kingdom Nov 2021 – Jun 2024

- Built a real-estate web application on a Laravel + Vue.js full stack, handling property data at scale.
- Worked as a Vue.js developer on the Carely app for a client engagement.

**Team Lead / Software Developer** — Spokesman Communication Ministries, Nigeria May 2017 – Aug 2021

- Built the ministry website and International Leadership Conference site end-to-end (Next.js frontend, Laravel backend, Filament admin panel).
- Migrated a legacy WordPress site to a custom Laravel CMS with zero data loss.

**Software Developer** — iQube Labs, Nigeria Jan 2015 – Nov 2018

- Advanced TradeWorkflow, a cargo-shipping application, from 40% to 80% complete using CakePHP.
- Built and managed RedBank, a Laravel application connecting blood donors with people in need.

## SELECTED PROJECTS

---

**Storyverse** — Laravel, React, MySQL · [storyverse.amowogbaje.com](https://storyverse.amowogbaje.com)

- Built a subscription platform integrating Stripe, Paystack, and Flutterwave with per-country pricing.

**CraftProfessor Story Engine** — Laravel, Vertex AI, Gemini, Cloudflare Agents, TogetherAI · [craftprofessor.amowogbaje.com](https://craftprofessor.amowogbaje.com)

- Built a fully automated AI content-generation and publishing pipeline; grew a Pinterest account's monthly views from 100 to 30.6K in 30 days with zero manual posting.

**database-repository (Packagist package)** — PHP, Laravel · [packagist.org/packages/amowogbaje/database-repository](https://packagist.org/packages/amowogbaje/database-repository)

- Published a Composer package automating database backups tied to Laravel's migration lifecycle.
