GIDEON AMOWOGBAJE

Full Stack Developer — Laravel, React, Next.js, Vue 3

hello@amowogbaje.com · +234 702 630 5945 · linkedin.com/in/amowogbaje · amowogbaje.com · github.com/amowogbaje
Ile-Ife, Osun State, Nigeria (open to fully remote)

PROFILE

Full stack developer with 8+ years of professional experience, primarily in PHP/Laravel, with React, Next.js and Vue 3 on the frontend. End-to-end ownership from Figma to deployment, admin tooling with Filament and Nova, integration-heavy systems (webhooks, multi-gateway payments, e-commerce syncing), and several of my own products built and run in production, in fully remote, distributed teams.

CORE SKILLS

Backend: PHP 8, Laravel (Eloquent, queues, Horizon, migrations, Policies & Gates, Livewire, Inertia), Node.js (NestJS, Express.js), Go, Python/FastAPI, CakePHP

Frontend: React, Next.js, Vue 3, TypeScript, JavaScript, Tailwind CSS, Alpine.js, Livewire, Angular (personal project), HTML, CSS; Figma-to-code on several projects

Databases & Messaging: MySQL, PostgreSQL, MongoDB, Redis, RabbitMQ, Laravel Horizon, event broadcasting, Pusher / Laravel Echo / Socket.io

APIs & Integrations: REST, GraphQL, webhooks, OAuth, OpenAPI/Swagger, Stripe, Paystack, Flutterwave, WooCommerce, Facebook Lead Ads, Pinterest and LinkedIn APIs, Google Places, DigitalOcean Spaces

Admin Tooling: Filament, Laravel Nova

Testing & DevOps: PHPUnit, Pest, Docker, Docker Compose, Git, GitHub, GitLab, Jira, CI/CD, DigitalOcean, Nginx, Linux

SOFTWARE DEVELOPMENT EXPERIENCE

Full Stack Developer — KOC, Nigeria (Contract)
Sep 2025 – May 2026

- Rescued a stalled project, turning a Figma design into a working, production-ready product from scratch under a tight deadline, then iterated to final delivery.
- Integrated transactional email and WooCommerce syncing, and built role-based permissions with Laravel Policies and Gates.
- Built a Notion-style, block-based blogging interface with Editor.js, improving content flexibility and the admin publishing workflow.

Full Stack Developer — Grace Filled Academy, Nigeria (Part-time)
Apr 2023 – Jun 2024

- Architected the full MySQL database structure from scratch for a scalable school-management system.
- Built a report-card system end to end with Laravel Livewire, JavaScript, HTML, Bootstrap, and CSS.
- Shipped a self-serve score-upload tool for teachers that automates calculations and cuts manual workload.
- Delivered a responsive Livewire portal for parents to view their children's academic reports remotely.
- Used Laravel factories and seeders for full integration test coverage.

Laravel Full-Stack Developer — Zerodip, Nigeria
Jan 2023 – May 2024

- Worked on FindHouse, a Laravel full-stack product, including Google Places integration and DigitalOcean Spaces for file storage.

Full Stack Developer — Thinkshifts, United Kingdom (Part-time)
Nov 2021 – Jun 2024

- Built a real-estate web application on a Laravel + Vue 3 full stack, handling property data at scale.
- Worked as a Vue 3 developer on the Carelly app for a three-month client engagement.
- Managed client websites with 100% customer satisfaction.

Team Lead — Spokesman Communication Ministries, Nigeria
Jun 2020 – Aug 2021

- Worked directly with the President to run IT operations for the ministry.
- Led a team of 6 for livestreaming and photography across a year of church media, recruiting and training team members.
- Built the ministry website (Filament admin panel, Laravel APIs, Next.js frontend) and the annual International Leadership Conference website.
- Migrated the ministry's asthma and chest care website from WordPress to a custom Laravel CMS with zero data loss.

Software Developer — Spokesman Communication Ministries, Nigeria
May 2017 – Jun 2019

- Built a membership portal with Laravel, HTML, CSS, Bootstrap, and JavaScript.
- Used Laravel-Excel to import and export the church database, speeding up collation.
- Helped oversee team activities as the team grew.

Software Developer — iQube Labs, Nigeria Jan 2015 – Nov 2018

- Advanced TradeWorkflow, a cargo-shipping app, from 40% to 80% complete using CakePHP.
- Built and managed RedBank, a Laravel app connecting blood donors with people in need, for 6 months.
- Managed Medifix, a WordPress healthcare-client site, for 3 months.

PRODUCTS & INDEPENDENT PROJECTS

Storyverse — Laravel, React, PostgreSQL/MySQL · storyverse.amowogbaje.com

- Serialized-fiction platform with guest reading, an author studio, episode-based access tiers, AI-assisted search, a badge/reward system, analytics, and subscriptions across Stripe, Paystack and Flutterwave with per-country pricing.

Qset — Founder, solo · Sep 2025 – Present · Laravel, React, MySQL, Redis · qset.amowogbaje.com

- Exam-generation platform for teachers: searchable question bank, exam-set builder, and Word (docx) export; also designed as a marketplace for exam-question resources.
- Integrated AI-assisted question generation with Laravel's AI package; upgraded the app from Laravel 11 to 13 and containerized it with Docker.

CraftProfessor Story Engine — Laravel 13, Gemini, Vertex AI, Hugging Face, TogetherAI, Pinterest API · craftprofessor.amowogbaje.com

- AI-assisted content pipeline for writers and bookstores: a story goes in, AI generates image and video options across several providers, I review and approve them, and the system publishes to Pinterest (with LinkedIn and Facebook also supported).
- Reported result: one Pinterest account grew from about 100 to 115K+ monthly views in roughly 60 days (October 2026) with no manual posting.

Nigeria Tax Calculator — Laravel, React, MySQL · tax.amowogbaje.com

- Live personal income tax estimator (NGN) with pension, health, and life-insurance deduction handling.

EDUCATION & CERTIFICATIONS

- B.Sc. Computer Engineering — Obafemi Awolowo University, Ile-Ife
- Web Mobile Development · PHP Certificate · HNG Finalist Certificate · SQL Advanced · JavaScript (Intermediate) · Leadership Training
