GIDEON AMOWOGBAJE

Backend Developer — Laravel, Go, NestJS, FastAPI · APIs & Integrations

hello@amowogbaje.com · +234 702 630 5945 · linkedin.com/in/amowogbaje · amowogbaje.com · github.com/amowogbaje
Ile-Ife, Osun State, Nigeria (open to fully remote)

PROFILE

Backend-leaning developer with 8+ years of professional experience, primarily in PHP/Laravel, with production work in Go, Node.js/NestJS and Python/FastAPI. Track record in integration-heavy systems (webhooks, OAuth token reconciliation, multi-gateway payments, e-commerce syncing), applied AI integration (Gemini, Hugging Face, TogetherAI, Vertex AI), and end-to-end ownership in fully remote, distributed teams.

CORE SKILLS

Backend: PHP 8, Laravel (Eloquent, queues, Horizon, migrations, Policies & Gates, Livewire, Inertia), Node.js (NestJS, Express.js), Go, Python/FastAPI, CakePHP

Databases & Messaging: MySQL, PostgreSQL, MongoDB, Redis, RabbitMQ, Laravel Horizon, event broadcasting, Pusher / Laravel Echo / Socket.io

APIs & Integrations: REST, GraphQL, webhooks, OAuth, OpenAPI/Swagger, Stripe, Paystack, Flutterwave, WooCommerce, Facebook Lead Ads, Pinterest and LinkedIn APIs, Google Places, DigitalOcean Spaces

Applied AI: Gemini, Hugging Face, TogetherAI, Vertex AI, Cloudflare Agents, Agnes AI, Laravel AI package; daily use of AI coding assistants (Cursor, Claude Code)

Testing & DevOps: PHPUnit, Pest, Docker, Docker Compose, Git, GitHub, GitLab, Jira, CI/CD, DigitalOcean, Nginx, Linux

SOFTWARE DEVELOPMENT EXPERIENCE

Software Engineer — Soulsper (fintech startup), Remote (Part-time)
Jun 2026 – Sep 2026

- Built internal tooling and infrastructure using FastAPI and Docker.

Backend Developer (Laravel → Go) — Dayout, United States (Part-time)
Jun 2024 – Sep 2026

- Rewrote core service endpoints — activities, notifications, emails, and comments — from Laravel to Go as part of the company's backend migration.
- Built a Push Notification Service from scratch, including three related endpoints, in a team of 3 backend developers.
- Led a research study comparing Laravel Eloquent against raw SQL that resulted in company-wide adoption of Eloquent; built all resulting database migrations from scratch and helped refactor the codebase around Dependency Injection and Laravel Models.
- Contributed to the OpenAPI documentation used by developers and users.

Backend Developer — Africred, Nigeria (Full-time)
Feb 2025 – Sep 2025

- Worked in a team of 3 developers; contributed to the structure of the company CRM and helped onboard the service team onto it.
- Built webhook ingestion for Facebook Instant Forms into the production CRM, importing prospective-client data for sales follow-up.
- Automated Facebook access-token expiry tracking and refresh with a scheduled Laravel command.
- Set up the company's official WhatsApp helpline, and led a research study to select the CRM's WhatsApp messaging provider.
- Maintained multiple interconnected repositories, writing integration code so separate applications could communicate reliably.
- Worked within a CRM database already in production and not designed for these integrations, using additive changes rather than a risky rewrite.

Backend Developer (NestJS, GraphQL) — Televerse, Nigeria (Part-time)
Apr 2023 – Jun 2024

- Developed optimized search APIs for the ReachMe app using NestJS, GraphQL, MongoDB, Redis, and RabbitMQ.
- Designed and implemented a simulated payment API with GraphQL, including secure coin-gifting endpoints.
- Built and optimized Lingo language endpoints for multilingual support.
- Collaborated closely with Flutter developers to integrate each feature into the mobile app.

Laravel Full-Stack Developer — Zerodip, Nigeria
Jan 2023 – May 2024

- Worked on FindHouse, a Laravel full-stack product, including Google Places integration and DigitalOcean Spaces for file storage.

Software Developer — Spokesman Communication Ministries, Nigeria
May 2017 – Jun 2019

- Built a membership portal with Laravel, HTML, CSS, Bootstrap, and JavaScript.
- Used Laravel-Excel to import and export the church database, speeding up collation.
- Helped oversee team activities as the team grew.

Software Developer — iQube Labs, Nigeria Jan 2015 – Nov 2018

- Advanced TradeWorkflow, a cargo-shipping app, from 40% to 80% complete using CakePHP.
- Built and managed RedBank, a Laravel app connecting blood donors with people in need, for 6 months.
- Managed Medifix, a WordPress healthcare-client site, for 3 months.

PRODUCTS & INDEPENDENT PROJECTS

Storyverse — Laravel, React, PostgreSQL/MySQL · storyverse.amowogbaje.com

- Serialized-fiction platform with guest reading, an author studio, episode-based access tiers, AI-assisted search, a badge/reward system, analytics, and subscriptions across Stripe, Paystack and Flutterwave with per-country pricing.

CraftProfessor Story Engine — Laravel 13, Gemini, Vertex AI, Hugging Face, TogetherAI, Pinterest API · craftprofessor.amowogbaje.com

- AI-assisted content pipeline for writers and bookstores: a story goes in, AI generates image and video options across several providers, I review and approve them, and the system publishes to Pinterest (with LinkedIn and Facebook also supported).
- Reported result: one Pinterest account grew from about 100 to 115K+ monthly views in roughly 60 days (October 2026) with no manual posting.

Qset — Founder, solo · Sep 2025 – Present · Laravel, React, MySQL, Redis · qset.amowogbaje.com

- Exam-generation platform for teachers: searchable question bank, exam-set builder, and Word (docx) export; also designed as a marketplace for exam-question resources.
- Integrated AI-assisted question generation with Laravel's AI package; upgraded the app from Laravel 11 to 13 and containerized it with Docker.

database-repository — Open-source Composer package · PHP, Laravel · packagist.org/packages/amowogbaje/database-repository

- Automates database backups tied to Laravel's migration lifecycle; grew from a personal backup script.

Go Streaming Backend — In progress · Go, PostgreSQL, Redis, Docker

- Local MVP with auth, billing, catalog, creators, playback and analytics modules, and a storage adapter so the provider can be swapped; aimed at web, mobile and Smart TV.

CI Triage Bot — Personal project · Python

- Analyses failed CI runs and comments on the pull request with a plain-English explanation of the likely cause.

EDUCATION & CERTIFICATIONS

- B.Sc. Computer Engineering — Obafemi Awolowo University, Ile-Ife
- Web Mobile Development · PHP Certificate · HNG Finalist Certificate · SQL Advanced · JavaScript (Intermediate) · Leadership Training
